

Matthew E. Struble

matt@struble.dev | struble.dev

Skills	Languages :	Python, C++, C, SQL, Java, Bash, LaTeX	
	Packages :	TensorFlow, Keras, OpenCV, NumPy, Scikit-Learn, Pandas, Matplotlib	
	Applications :	AWS, Kubeflow, Docker, Jenkins, Airflow, Jupyter, MATLAB, Git, Neovim	
Experience	Lead Software Engineer - AI/ML		Nike
	Feb 2021 - Present		Boston, MA
	- Planned, designed, and performed, multiple cross-team software migrations into AWS SageMaker. - Optimized PySpark pipelines, drastically reducing model training and inference time, and improving overall model accuracy. - Developed a standardized Python package for AWS, logging, and test reliability, to reduce Data Scientist overhead within AWS environments. - Led the initiative to update repositories and defined engineering best practices, reducing development time and increasing CI/CD reliability within Jenkins. - Onboarded and supported offshore team by running agile ceremonies and creating documentation on engineering standardization, expectations, and software redesign. - Designed, and implemented, transition from batch file processing to a new API endpoint for forecasting models.		
	Mission Critical Software Engineer		(Under Contract To) Draper
	Mar 2019 - Jun 2020		Cambridge, MA
Projects	- Developed data analytics tools with machine learning algorithms to assist engineers with hardware analysis. - Processed system data, sensor data, and real time flight data in order to improve GNC algorithms. - Took on responsibilities of Scrum Master and led CI/CD initiative.		
	Senior Software Engineer		(Under Contract To) Raytheon
	Oct 2018 - Mar 2019		Tewksbury, MA
	Implemented signal processing algorithms, and time critical control functions, involved in direct control of sensor systems.		
Education	Deep Learning Photo Aesthetics		
	Researched modern classification models, and developed supporting tools, in order to create a novel deep learning model to classify photo aesthetics.		
	Heineken AR Cheers Campaign		
	Created an object detection model on AWS for an adaptive AR experience.		
	Analyzing Climate Change Stance Through Twitter Data		
	Tested multiple NLP algorithms like bag of words, ensemble, and BERT, in an attempt to understand and visualize Americans' views of climate change over time.		
	Georgia Institute of Technology		Atlanta, GA
	<i>Master of Science</i> , Computer Science Machine Learning, Computational Perception and Robotics		
	Champlain College		Burlington, VT
	<i>Bachelor of Science</i> , Game Programming <i>Minor</i> : Mathematics
